

MOVING GREEN ENERGY FORWARD

Simplifying Carbon Trading and Renewable Energy Tracking and
Management

Trusted Partner Of UTICASIA Energy PTE LTD

UTICA[®]

THE ELEKTRIK
COMPANY

WHAT IS OUR GOAL?

SOLARGAGA aims to create a comprehensive platform that includes an **advanced carbon trading exchange**, complemented by a **smart-driven after-sales and transparent renewable system tracking information portal**.

This is formatted into **GAGA-Exchange** and **GAGA-Portal** respectively.

Both components of SOLARGAGA ensure that only high-quality, verified systems are traded in our exchange. Our commitment extends to maintaining these systems for optimal efficiency and longevity.

Experienced Partners

SOLARGAGA Pte Ltd was established as a subsidiary of UtiAsia Holdings, making it the third entity within UtiAsia, alongside UTICA and The Elektrik Company.

UTICA Solar, a pioneer in the Singapore solar industry, is renowned for installing reliable, high-quality systems.

Notable installations include the Singapore Expo MICE, various commercial warehouses, and the residence of Singapore's former Prime Minister.

What is the **GAGA-Exchange**?

The **GAGA-Exchange** is the carbon trading wing of SOLARGAGA, focused on delivering, verifying and categorizing high-quality RECs. We believe in contributing to the growth of renewable energy by incentivizing and monetizing the potential of renewable energy systems globally.

What is the **GAGA-Portal**?

The **GAGA-Portal** is the additional services and information wing of SOLARGAGA, offering unique, tailored access based on the type of account registered with SOLARGAGA. Prioritizing transparency while ensuring data privacy, the portal can handle and track renewable asset output data, provide fault indications, track warranty and issue maintenance warnings to project owners, check warranty, among many other technical features.
